PROYECTO GDELT

Pipeline de Datos Geopolíticos End-to-End

AWS Lambda · Amazon S3 · Snowflake · dbt · Power BI

¿Qué es GDELT?

300+

idiomas monitorizados

15min

frecuencia de actualización

61

columnas por evento

2015

inicio GDELT v2

GDELT (Global Database of Events, Language and Tone) analiza noticias de todo el mundo en tiempo real y genera eventos geopolíticos estructurados cada 15 minutos.

.export

Eventos geopolíticos
